Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

DETAILED ACTION

1. This action is responsive to the Applicant's communication filed on 4/30/2003.
2. Claims 1-9 have been amended and claims 11-16 added, and claim 10 canceled.
3. Claims 1-9, and 11-16 are pending and presented for examination.
4. Applicant's arguments filed on April 30, 2003 have been fully considered and they are deemed to be persuasive.

Specification

5. In accordance with the MPEP 606.01, please replace the current Title,

“DATA FILE SYNCHRONIZATION” with

--- DATA FILE SYNCHRONIZATION BETWEEN A SOURCE FILE AND REMOTE FILES
IN A NETWORK ---

Allowable Subject Matter

6. Claims 1-9, and 11-16 are allowed over the prior art of record.
7. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 4, 7, 11, and 14, Applicant's particular method for synchronizing data between a receiving computer and a sending computer in a networking environment comprising of a source file at the sending computer and a reference file at the receiving computer (i.e., first computer). All the independent claims recite that the performance

Art Unit: 2175

of the computation, the comparison and the construction of the target file has been done at the receiving computer (i.e., first computer) such as “at the receiving computer, comparing the source key values with reference values computed for respective blocks comprising a predetermined number of contiguous data units in the reference file to determine matches between source key values and reference key values; communicating from the receiving computer to the sending computer an indication of which source keys do not have matching reference keys, and transmitting data blocks from the source file corresponding to the unmatched source keys from the sending computer to the receiving computer; and constructing at the receiving computer a target file from the contiguous data units in the reference file determined to have reference key values matching respective source key values and the data blocks from the source file received from the sending computer wherein the constructed target file at the receiving computer is synchronized with the source file at the sending computer.” These limitations in combination with the other limitations of the claims were not disclosed by, would not have been obvious over, nor would have been fairly suggested by the prior art of record.

The closest prior art, Pyne (U. S. Pat. No. 5,721,907) and Carson (U. S. Pat No. 5,978,805) disclose conventional synchronization wherein the computation and construction of data have been done in the sending computer (i.e., source computer) which opposite to the applicant's method. Carson and Pyne do not implicitly disclose their system to perform the computation, the comparison and the construction the data file at the receiving computer (i.e.,

Art Unit: 2175

first computer) as claimed by the Applicant. The prior art neither singularly or in combination, fail to anticipate or render Applicant's limitations above obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
